# Water Tank Problem

Given `n` is always greater than -1, representing the block height. Now compute the units of water stored in-between the blocks. Build a Web Application (Frontend Solution) using Vanilla JavaScript and HTML/CSS to represent the solution. Share the code and snippets in a Git repository

*Hint: Generate SVG Shape (preferred) or Table View like the one below,*

**Example**

Input

[0,4,0,0,0,6,0,6,4,0]

Output

18 Units
